

what is PL/SQL

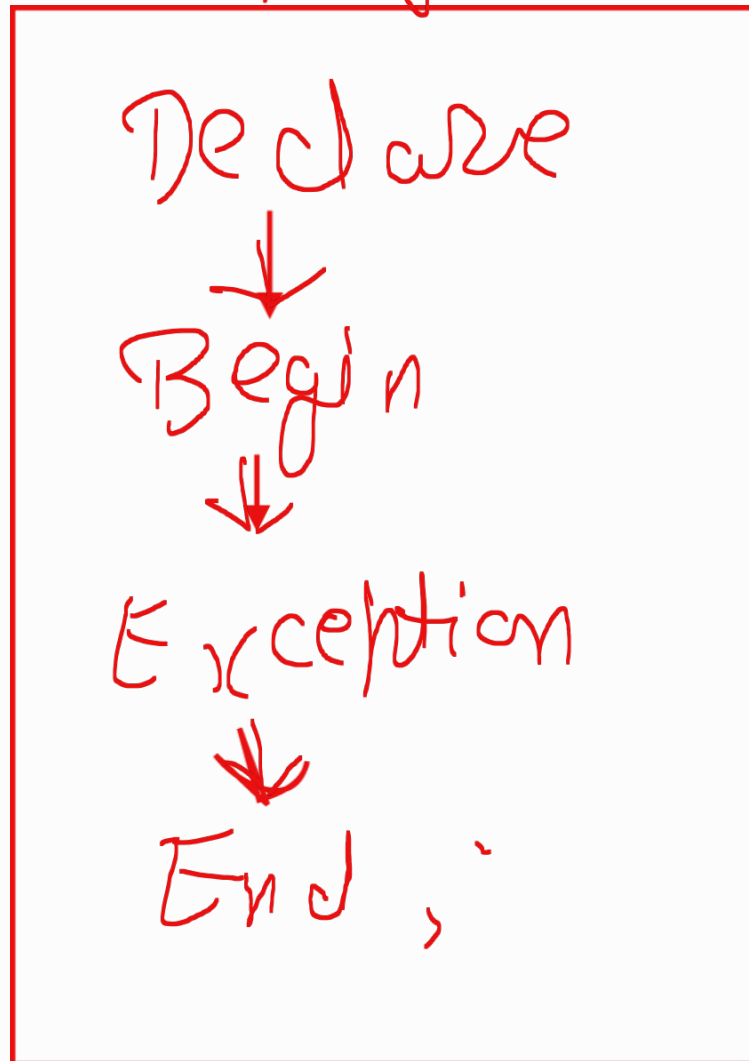

PL/SQL - Procedural Language
extension to SQL with
design feature of programming
languages

Data manipulation & query
statements of SQL are included
within procedural units
of codes

Benefits

- Improved Performance
- modularize program development

Two Blocks in PL SQL

- ① Anonymous Block
- ② Named Block - stored as an obj in DB.

Procedure	}	this are Named Block
Function		
Package		
Trigger		

① Anonymous block

Declaration First

- Variable declaration
- This is optional part

Begin

-- executable statements > - Mandatory

Exception

-- Exception handling code
-- optional

end; -- Mandatory.

\$\$;

How to print anything in PLSQL

10

\$\$

Begin

Raise NOTICE 'welcome';

end \$\$;

Add 2 numbers.
~~do~~

Declare
 n_1 int(10);
 n_2 int(10);

Begin

Raise NOTICE($n_1 + n_2$)

End ~~do~~ ~~if~~;

Adding 2 no using user
input in postgres.

create or replace procedure

demo (a int, b int)

language plpgsql

as \$\$

begin

Raise Notice 'Sum = %';
a+b;

end

\$\$;

call demo (10, 20);

~~★~~ How to fetch data from table in
base table
PL/SQL

PLSQL Block

```
variable  
begin  
select data from base table;  
ex. select name into v_name from C  
where id=1;  
end
```

customer

cursor
bulk select
If want to
select multiple
data from table

Insert statement in PL/SQL

begin

insert into customer (id, name, mob_no, age, city)
values (100, 'Nir', 9172881903, 24, 'mumbai');

Commit;

End;
